

## **ENERTHERM HT5**

## **DESCRIPTION:**

Eterna Enertherm HT5 is a high viscosity index mineral oil selected for its high thermal and oxidation stability.

## **APPLICATION:**

It has a relatively low viscosity and high boiling and flash points which makes it ideal for use in closed heat transfer systems.

## **BENEFITS:**

A low viscosity fluid is required when operating under turbulent flow conditions to achieve a very high heat transfer rates. The maximum recommended bulk oil temperature is  $320^{\circ}$ C.

TECHNICAL DATA:	
Density @ 15°C, kg/ltr	0.868
Viscosity @ 40oC, cSt	30.5
Viscosity @ 100°C, cSt	5.28
Viscosity Index	106
